SENIOR PRODUCT ENGINEERING

Zachary Carlin

Senior Software Engineer · Full-Stack TypeScript · Applied AI

Senior software engineer with eight years shipping and modernizing B2B financial-data, ad-tech, identity/healthcare, and IoT products. I lead frontend delivery, work across TypeScript/Node APIs and data systems, and turn legacy platforms into maintainable products for remote teams.

EXPERIENCE

2023—Now

Main Street Data · Senior Software Engineer

- Lead frontend development for a B2B financial-data product, delivering production interfaces from product and Figma direction.
- Built a KPI API for B2B clients; contribute across frontend, API, and data concerns.
- Led the Next.js pages-to-app-router migration and introduced server-side rendering for stronger initial-load behavior.
- Maintained delivery through a startup acquisition and organizational change.

2022—2023

Sonobi · Senior Software Engineer

- Built React applications across legacy class components and modern hooks.
- Modernized jQuery workflows into maintainable React components and asynchronous product flows.
- Integrated PHP and Python services; optimized GraphQL and Postgres-backed API paths.
- Contributed to Prebid.js and led daily engineering coordination.

2021—2022

Dogwood Logic · Software Engineer

- Implemented decentralized identifiers and verifiable credentials with Node.js and TypeScript.
- Built Vue.js interfaces for encrypted healthcare applications using test-driven development.

2018—2020

Gulf Photonics · Software Engineer

- Led software development for an IoT embedded sensor and its web dashboard.
- Built Node.js/Vue interfaces and APIs; managed MongoDB and Firebase across desktop and mobile environments.

FOUNDATION

Bridge · Web Developer

Built a Vue.js application for a 5G-router marketing initiative with external partners.

How I work

Remote ownership, direct communication, pragmatic testing, measured modernization, and maintainable delivery.
